

# Summer school in Trapani (Sicily) Kandinskij Academy

An ancient beautiful city jutting out into the  
sea...

The **KANDINSKIJ ACADEMY OF FINE ARTS** is  
delighted to offer you the opportunity of  
creative study during the summer months, in  
these breath-taking locations.

The Academy is located in an ancient former  
monastery close to the sea, built at the  
beginning of the XVII th century, in the heart of  
the most ancient historical city of Trapani.

The building, which has been completely  
restored, represents today a functional place  
for the **Kandinski Academy of Fine Arts**.

Inside the Academy you will find conference  
rooms, libraries, laboratories, student lodgings  
and free wi-fi .

Situated less than 5 minutes walking distance  
from the port, 10 minutes from the bus  
terminal, 15 from the railway station, 30  
minutes from the cable car up to Erice.

Once lessons are finished for the day, it only  
takes a few minutes to get to the beach or take  
a **hydrofoil** to Favignana on the Egadi Islands.

Kandinskij Academy was founded in 1999 and  
is **Recognised** by the Ministry of Higher  
Education and Research.

From July to September, the Academy runs a SUMMER SCHOOL called: ***“Emotions of the Land”*** which includes modules such as: Artistic Photography, Painting, Drawing, Italian and Coral Craftwork.

## Artistic Photography

On the course, you study shooting and digital image editing techniques.

Once you have learnt these techniques, you will have the opportunity of going out and exploring the beautiful Trapani landscapes, through the lens of a camera and video equipment, hence stimulating your individual creativity.

Professional expert photographers will take you around, acting as your guides, providing you with that vital knowledge from both an educational and inventive perspective.

## Drawing, Painting, Engraving

The course aims to provide participants with gaining an emotional attachment to Trapani's landscape, drawn from these many wonderful visions produced through paintings and graphics, using the Academy's facilities.

With qualified teachers in specific areas, the programme intends to offer leading educational activities.

## Italian

It teaches two levels of Italian: Beginner's and Advanced. The beginner's course is designed to develop basic communication skills, enough to understand the language used on a daily basis.

The advanced course develops the use of more complex grammatical forms, as well as analysing the spoken language, most used in Italian.

## Coral Workshop

Trapani is known as the City of **Coral** and intends to stress this to the many foreign visitors coming from all over the world.

There is an authentic laboratory in place, to reconstruct the work of coral craftsmen in their workshop. Its goal is to encourage the public to form active, critical and responsible opinions towards the artistic and cultural heritage of this city, as concerns both the ancient traditional art of Trapanese coral making, and the new prospect of what this art represents to this day. Using the creative process of making a necklace as a means of obtaining an unparalleled insight into the city's heritage.

### "Emotions of the Land"
